Gross collections, refunds and net collections, aggregated on a quarterly basis, are presented on the following three charts. Remember that if the quarter is not yet complete, quarter-to-date figures are still presented on the chart. *Therefore, if this report is only one or two months into a quarter, the corresponding bar for that quarter in the charts below will be incomplete.* The fourth chart, a stacked bar chart, shows net collections for each fiscal year, divided into quarters.

**CORPORATE REFUNDS**

Corporate refunds paid in any state fiscal year are for a mixture of corporate fiscal years. The table below presents the percent of refunds paid in FY 14/15 by corporate fiscal year. For example, in FY 14/15, 44.5% of the refund dollars paid were for corporate fiscal years ending in 2010 or before. The percentages are for refunds paid through the fiscal year.

<b>Corporate Fiscal Year-End:</b>	<b>10 &amp; Prior</b>	<b>11</b>	<b>12</b>	<b>13</b>	<b>14</b>	<b>15</b>
FY 14/15	44.5%	0.2%	4.0%	44.8%	6.5%	0.0%

FY 15/16	63.5%	2.6%	1.8%	31.4%	0.7%	0.0%

The corporate refunds shown above are those refunds for which a check is mailed to the corporation. Sometimes corporations choose to apply their refund as an estimated payment. The following table presents refunds applied as estimated payments in the most recent month and for the calendar year.

The following chart shows corporate refunds over \$10,000, by quarter within the fiscal year. The columns illustrate the number of refunds over \$10,000; the lines show the aggregate value of the refunds over \$10,000. Remember this data is in a quarterly format; if this report is for a period that is less than the full quarter, the corresponding column or point on the line graph is incomplete.

**CORPORATE INCOME TAX DOCUMENT COUNT**

The Arizona Department of Revenue received 135,362 corporate returns showing a fiscal year-end of 2013. The type of return received is indicated below:

	<b>120 X (Amended)</b>	<b>120 (Regular)</b>	<b>120S (S Corp)</b>	<b>99T (Exempt Org.)</b>	<b>120 A (Short Form)</b>

%	0.1%	25.1%	65.1%	0.7%	9.0%

Through August 2015, 87,691 documents were received for a fiscal year-end of 2014, distributed as follows:

	<b>120 X (Amended)</b>	<b>120 (Regular)</b>	<b>120S (S Corp)</b>	<b>99T (Exempt Org.)</b>	<b>120 A (Short Form)</b>
#	45	17,484	59,845	501	9,816
%	0.1%	19.9%	68.2%	0.6%	11.2%

The figures for the 2014 returns are most meaningful when compared to 2013 returns received during the same period of time in the previous year. Through August 2014, the Department of Revenue received 92,334 documents with a fiscal year-end of 2013. Compared to 2014 documents, the Department has seen a 5.0% **decrease** in the number of corporate returns processed at this point of time in the calendar year.

**CORPORATE TAX LIABILITY**

Corporate revenues and refunds for large corporations flow through the state coffers over three state fiscal years for each corporate fiscal year. For example, consider a corporate fiscal year that corresponds to the calendar year. Estimated payments are received in April of state fiscal year X. More estimated payments are received in the second half of the calendar year, which is state fiscal year Y. In April of the following calendar year, still state fiscal year Y, either the final corporate return is filed with payment made or notice of refund due or an extension is filed with some payment. Large corporations nearly always file an extension, which means final returns are not submitted until October, which is state fiscal year Z. These final returns will have payments or notice of refund due.

The following chart shows corporate tax liability within a calendar year. The data for this table aggregates all payments and refunds for corporate fiscal years, regardless of state fiscal year, and then all corporate fiscal years are aggregated within a calendar year. For example, fiscal years ending January 2010, February 2010, March 2010, etc., are aggregated into 2010. The maroon bars are liability totals from last month; the blue bars are liability totals from the current month. The difference is the activity occurring in the current month. The yellow bars represent the aggregate liability from a year earlier. For example, in April 2013, net payments for fiscal year 2012 were \$696 million. In April 2014, net payments for fiscal year 2012 had dropped to \$633 million. This means that \$63 million in refunds for that tax year was paid between April 2013 and April 2014.

**Corporate Tax Liability Within A Calendar Year**

All payments and refunds are aggregated by fiscal year-end for which the payment was received or refund was paid. This creates a net corporate liability for fiscal year periods. The data can be aggregated in a number of different ways, each having its own problems in reconciling to the state fiscal year net corporate collections. The following table shows data aggregated by state fiscal year in which it is received. The problem here is capturing the fiscal year-end of the corporation for all transactions. Therefore, for each state fiscal year's worth of data, a varying amount of revenue is missing from this database. See the table on the following page, Corporate Payment Totals by DOR Fiscal Year, to view the data components.

The final table included with this report, Grand Total Net Corporate Payments by Corporate, present revenues for each corporate fiscal year, aggregated by calendar year, and grouped by the state fiscal year within which they were received or paid. Moving horizontally in each row beginning with 1987, there are three numbers for each corporate fiscal year that represent the bulk of tax liability for all corporations with a corresponding fiscal year end.
