
Arizona Modernized e-File (MeF) QuickAlert - 04/12/2013

Correction - Arizona MeF Timeliness

MeF QuickAlert - Correction

Timeliness

Tax Return

- Returns submitted on or before April 15th would be considered timely.
- Returns corrected and resubmitted during the correction period (April 15th - 20th) would also be considered timely.

Direct Debit Payment

- Returns and payments for the tax due submitted on or before April 15th would be considered timely.
- Returns and payments for the tax due submitted after April 15th would be considered late.

Timeliness

Return - MeF uses the <Timestamp> element in the ReturnHeaderState schema as the Postmark Date. Returns submitted on or before April 15th would be considered timely; returns corrected and resubmitted during the correction period (April 15-20) **will contain the original <Timestamp> in the <OriginalSubmissionDate> element and would be considered timely.**

Direct Debit Payment - MeF uses the <RequestedPaymentDate>.

- Return submission date (<Timestamp>) before April 15th -- the <RequestedPaymentDate> can be a future date, not to exceed April 15th. If we had some delay in retrieving submissions, and processed the return and payment requests the Direct Debit after the <RequestedPaymentDate>, the return and payment would be considered timely.
- Return submission date after April 15th -- <RequestedPaymentDate> **MUST** be the same date as the <Timestamp>.

Thank you for using Arizona MeF.
