### **General Instructions**

---

---

Arizona Revised Statutes §§ 43-1090 and 43-1176 provide nonrefundable individual and corporate income tax credits for the installation of solar hot water heater plumbing stub outs and electric vehicle recharge outlets in houses or dwelling units constructed by the taxpayer. The houses or dwelling units must be located in Arizona.

Qualifying installations of solar hot water heater plumbing stub outs must:

- Include two insulated three-fourths inch copper pipes and at least two pairs of wires for monitoring and control purposes that project from the dwelling roof or other suitable locations and that are connected to the domestic hot water transport and storage system.
- Be located and configured to allow sufficient solar access and exposure and to allow ready installation of solar water heating devices without further expense or effort to reach, use or serve the domestic hot water system of the house or dwelling.

Qualifying installations of electric vehicle recharge outlets must be connected to the utility system by a dedicated line that:

- Is capable of operating at normal secondary voltages.
- Meets applicable local building safety codes.
- Is commensurate and consistent with electric vehicle recharging needs and methods.

The amount of the credit is equal to the lesser of \$75 or the installation cost for each installation of a solar hot water heater plumbing stub out or an electric vehicle recharge outlet in each separate house or dwelling unit.

The taxpayer that constructed the house or dwelling unit may transfer the credit for that house or dwelling unit to a purchaser or transferee. A taxpayer that transfers the credit for a house or dwelling unit must provide a written statement to the purchaser or transferee of the house or dwelling unit. The written statement must include the name of the purchaser or transferee, the address of the house or dwelling unit, the number of stub outs or outlets installed, the installation cost of each, and a certification that the taxpayer has elected not to claim the credit and has elected to transfer the credit to the purchaser or transferee. If the builder transfers the credits for more than one house or dwelling unit to a purchaser or transferee, the builder must provide a separate written statement for each house or dwelling unit.

The tax credit is in lieu of a deduction for the expenses of installing the solar hot water heater plumbing stub outs and electric vehicle recharge outlets for which the credit is claimed.

Co-owners of a business, including partners in a partnership and shareholders of an S corporation, may each claim only the pro rata share of the credit allowed based on the ownership interest. The total of the credits allowed all such owners may not exceed the amount that would have been allowed for a sole owner of the business.

The credit is available to an exempt organization that is subject to corporate income tax on unrelated business taxable income (UBTI). The credit must result from the activities that generate UBTI.

If the allowable tax credit exceeds the taxes otherwise due, or if there are no taxes due, the amount of the credit not used to offset taxes may be carried forward for not more than five consecutive taxable years as a credit against subsequent years' income tax liability.
