General Instructions

Arizona Revised Statutes §§ 43-1083.02 and 43-1164.03 provide nonrefundable individual and corporate income tax credits for production of electricity by a qualified energy generator that produces electricity using a qualified energy resource.

“Qualified energy generator” means a facility that has at least five megawatts generating capacity, that is located on land in Arizona owned or leased by the taxpayer, that produces electricity using a qualified energy resource and that sells electricity to an unrelated entity, unless the electricity is sold to a public service corporation.

“Qualified energy resource” means a resource that generates electricity through the use of only: solar light, solar heat, wind or biomass.

The qualified energy generator must first produce electricity from and after December 31, 2010, and before January 1, 2021. The credit is effective for taxable years beginning from and after December 31, 2010.

The Department of Revenue (Revenue) will certify credits on a first-come, first-served basis. The entity that holds title to the qualified energy generator must apply between January 2 and January 31 of the year following the calendar year of production. Fiscal year taxpayers will claim the credit on the return for the taxable year in which the calendar year ends.

The amount of total credits Revenue may allow cannot exceed \$20 million in any calendar year. The amount of credit per facility is limited to \$2 million per calendar year, for up to 10 consecutive calendar years. The amount of the credit is based on electricity produced, the qualified energy resource used, the year of production, and Revenue certification.

Revenue will issue a Certificate of Renewable Energy Production Tax Credit (Certificate) to the applicant if it is certified to claim the tax credit. Each taxpayer must include a copy of the Certificate with the return.

Co-owners of a business, including partners in a partnership and shareholders of an S corporation, may each claim only the pro rata share of the credit allowed based on the ownership interest. The total of the credits allowed all such owners may not exceed the amount that would have been allowed for a sole owner of the business.

The credit is available to an exempt organization that is subject to corporate income tax on unrelated business taxable income (UBTI). The credit must result from the activities that generate UBTI.

The unused portion of this tax credit may be carried forward for five succeeding taxable years.

For more information regarding this credit, review the program guidelines developed by Revenue, available at www.azdor.gov on the Tax Credits page.

Specific Instructions

Complete the name and taxpayer identification number section at the top of the form. Indicate the period covered by the taxable year. Include the completed form with the tax return.

All returns, statements, and other documents filed with the department require a taxpayer identification number (TIN). The TIN for a corporation, an exempt organization with UBTI, an S corporation, or a partnership is the taxpayer's employer identification number. The TIN for an individual is the taxpayer's social security number or an Internal Revenue Service individual taxpayer identification number. A taxpayer that fails to include its TIN may be subject to a penalty.
