

2022 Personal Property Valuation Tables and Index

Preface

In 2018, the Department of Revenue (Department) Manuals Team undertook a major project to update all publications produced by the Property Tax Unit. The following three levels of updates were to be applied, dependent upon the perceived need:

Review: Publication conforms to standard style and formatting. Legislative and other citations verified. No changes to content, methodology, policy, or practice.

Revision: Includes applicable Review processes. Publication is newly edited. Nonsubstantive legislative changes incorporated. Addition or deletion of information that does not alter valuation methodology.

Rewrite: Includes applicable Review and Revision processes. Major substantive changes made to any combination of content, valuation methodology, policy, or practice.

This publication is a Rewrite, even though it is a new publication, because it was created from an existing portion of the *2021 Personal Property Manual*. This publication supersedes all previous valuation tables and indexes published by the Department and remains effective until replaced. Additional information may be issued as an addendum to this publication or as a separate publication. Due to the flexibility provided for in statute, deadlines and procedures may vary from county to county across the state. The Department recommends contacting your county assessor for detailed information regarding the deadlines and procedures in their jurisdiction. The information in this publication is based upon laws and rules in effect at the time of publication. Should any content in this publication conflict with current laws or rules, the latter shall be controlling.

In 2021, the Department completed a significant reorganization project that involved this publication, consistent with the Department goals of streamlining publications and reducing duplicated information. The resulting changes were mainly organizational in

nature and were not made with the intention of effecting any substantive changes, except as required by law.

At the conclusion of this project, the contents of two publications, the *2021 Personal Property Manual* and the *Manufactured Home / Mobile Home and Recreational Vehicle or Travel Trailer Parks* guideline (2018), were recombined to form the following publications:

- [*2022 Business Personal Property Manual*](#)
- [*2022 Personal Property Valuation Tables and Index*](#)
- [*Manufactured Housing Manual*](#)

Authority

Authority to produce this publication is found in Arizona Revised Statutes (A.R.S.) [42-11054\(A\)](#). Regarding the weight of authority of this publication, see A.R.S. [42-13051\(B\)\(2\)](#).

Terminology

In this manual, the term “manufactured housing” is used in a general way and can refer to all types of manufactured housing described in Arizona statute, including, among others, mobile homes, recreational vehicles, and manufactured housing used for commercial purposes. Additionally, the plural term for “manufactured home” used herein is “manufactured homes,” rather than “manufactured housing”.

Introduction

Arizona law provides authority for the identification, classification, valuation, and assessment of taxable personal property. These duties are administered jointly by the Department and the 15 county assessors. This publication contains information to assist these personnel with the annual valuation and assessment of **locally assessed** business personal property. **This publication is not intended for use in the valuation and assessment of centrally valued business personal property.**

For more information regarding the centrally valued property, refer to the Department publications entitled [*Appraisal Manual For Centrally Valued Natural Resource Property*](#), *Centrally Valued Properties*, and *Valuing Underlying Leased Land on a Wind Farm*.

Manufacturing Property Index

The following Index sets forth recommended life years associated with various **manufacturing process categories**. These recommendations **should NOT be used to value end products, but rather the machinery and equipment used to produce them**. For example, consider the index listing for manufactured housing:

2022 Valuation Tables

Application of Additional Depreciation

Business personal property in the following property classes and subclasses is to receive additional depreciation for 2021.

Property Class One, Subclasses (8), (9), (10), and (13)

Property Class Two, Subclass (P) (a), (b), (c), (d), and (e)

Property Class Six, Subclasses (2) and (3)

For property Classes One and Two, additional depreciation applies to property that was initially assessed in Arizona during or after the 2012 tax year. A.R.S. [42-13054\(B\)\(3\)](#) and [42-13353\(C\)](#). For property Class Six, additional depreciation applies to property initially assessed in Arizona during or after the 2018 tax year. A.R.S. [42-13054\(B\)\(3\)](#) and [42-13353\(C\)](#). For additional information, refer to the section entitled “Additional Statutory Depreciation” in the [Business Personal Property Manual](#).

The Department valuation tables contain valuation factors for the calculation of **both standard and additional depreciation**. **Nonshaded rows in the tables contain standard valuation factors** that are used to calculate the full cash value of an asset. **Shaded rows contain additional depreciation factors** for application to qualifying personal property.

Additional statutory depreciation will not reduce the valuation of personal property below the minimum value prescribed by the Department for property in use. A.R.S. [42-13054\(C\)\(2\)](#) and [42-13353\(D\)](#).

Application of Minimum Value

A minimum valuation factor is applied if business personal property is still in use after the number of expected life years has passed. In contrast to depreciation under federal taxation, personal property still in use maintains a minimum value, never reaching zero, until it is scrapped or discarded. Business personal property in property classes One,

Subclasses (8), (9), (10), (13), and property Class Two, Subclass (P), that qualifies for additional depreciation will receive a reduction in the minimum value of 2.5 percent each year, beginning in 2000. A.R.S. [42-13055\(A\)](#). However, the minimum value of taxable personal property still in use will not be reduced below 2.5 percent good. A.R.S. [42-13055\(B\)](#). See also A.R.S. [42-13054\(C\)\(2\)](#) and [42-13353\(D\)](#).

Application of the Business Personal Property Exemption

For 2022, the first \$207,366 of the full cash value of taxable personal property will be exempt. A.R.S. [42-11127](#). Business personal property in the following property classes and subclasses is eligible for this exemption.

Property Class One, Subclasses (8), (9), (10), (11), and (13).

Property Class Two, Subclass (P) (a) and (b).

Pursuant to A.R.S. [42-11127](#), the Department is required to annually adjust the maximum exemption amount for the following tax year to account for inflation. The inflation adjustment is based on the total biennial change in the U.S. Bureau of Labor Employment Cost Index for the two most recent complete state fiscal years.

Trending and Improvement Depreciation

[Valuation Table 1](#) is trended for price changes in acquisition cost, based upon data from a published comparative cost index.

[Valuation Table 6](#) is designed to mirror depreciation applied to the real property rolls. It provides a way to depreciate what would normally be considered real property improvements on the personal property rolls. Alternatively, the same result can be obtained by determining a value for the improvement in question on the real property roll and then annually listing that amount on the personal property roll.

2022 Valuation Table 15

The square foot valuation method is based on published building cost indexes. Key features of the square foot method include:

- Replacement cost new less depreciation (RCNLD) is derived, rather than historic cost less depreciation.
- Quality indicator / grade is based on the original quality of the manufactured housing.¹
- Separate depreciation schedules are used for single- and multi-section manufactured housing.
- Depreciation tables are created using manufactured housing sales.
- Additional adjustment may be necessary for mobile offices, park models, or travel trailers.

The replacement cost new of a manufactured housing unit is calculated based on size, number of sections, and construction quality. The replacement cost new will be adjusted annually to reflect changes in the manufacturing costs of new manufactured housing units. With respect to size, only livable square footage should be included. Because the dimensions listed on a title may include structures like the towing tongue and/or porch of a manufactured housing unit, a field check is necessary to obtain accurate measurements for calculating the livable square footage.

The appropriate valuation factor is applied to the replacement cost new to derive the replacement cost new less depreciation for each manufactured housing unit. Valuation Table 15 contains valuation factors to be used with the square foot method.

¹ The quality indicator / grade benchmarks developed by the Department are based upon statewide data and should be used only as a starting point. Assessors should conduct a field check in order to make a final determination of the quality indicator / grade of individual manufactured housing units.
