

2023 Personal Property Valuation Tables and Index

Preface

The Arizona Department of Revenue (Department) administers the property tax system in cooperation with the 15 county assessors, among others. One of the administrative duties of the Department is to prepare and maintain publications reflecting standard and statutory appraisal methods and techniques that are used in the identification, classification, valuation, and assessment of property for ad valorem purposes. The Department regularly updates these publications, consistent with the following three update levels, depending on the perceived need:

Review: Publication conforms to standard style and formatting. Legislative and other citations verified. No changes to content, methodology, policy, or practice.

Revision: Includes applicable Review processes. Publication is newly edited. Nonsubstantive legislative changes incorporated. Addition or deletion of information that does not alter valuation methodology.

Rewrite: Includes applicable Review and Revision processes. Major substantive changes made to any combination of content, methodology, policy, or practice.

This publication is a Rewrite. It supersedes all previous valuation tables and indexes published by the Department and remains effective until replaced. Additional information may be issued as an addendum to this publication or as a separate publication. Due to the flexibility provided for in statute, deadlines and procedures may vary by county. The Department recommends contacting the county assessor of the county in which a subject property is located for detailed information regarding the deadlines and procedures in that jurisdiction. **The information in this publication is based upon laws and rules in effect at the time of publication. Should any content in this publication conflict with current laws or rules, the latter shall be controlling.**

All comments, inquiries, and suggestions concerning the material in this publication may be submitted to the following:

Introduction

Arizona law provides authority for the identification, classification, valuation, and assessment of taxable personal property. These duties are administered jointly by the Department and the 15 county assessors. This publication contains information to assist these personnel with the annual valuation and assessment of **locally assessed** business personal property. **This publication is not intended for use in the valuation and assessment of centrally valued business personal property.**

For more information regarding centrally valued property, refer to the Department publications entitled [Appraisal Manual For Centrally Valued Natural Resource Property](#), [Centrally Valued Properties](#), and [Valuing Underlying Leased Land on a Wind Farm](#).

For property Classes One and Two, additional depreciation applies incrementally to eligible personal property that was initially classified in Arizona during or after 2012 through 2021. A.R.S. [42-13054\(B\)\(3\)](#) and [42-13353\(C\)](#). For property Class Six, additional depreciation applies incrementally to eligible personal property acquired during or after 2017 through 2021 and initially classified in Arizona during or after 2018 through 2021. A.R.S. [42-13054\(B\)\(3\)](#) and [42-13353\(C\)](#).

Incremental additional depreciation is applied to the full cash value of eligible personal property over the first five years of the property's use. A.R.S. [42-13054\(B\)\(3\) \(a\) through \(e\)](#) and [42-13353\(C\) \(1\) through \(5\)](#). Beginning in the sixth year, and continuing through subsequent years, the eligible personal property is depreciated as prescribed in the

⁴ **Note:** The statutes that prescribe additional depreciation set forth specific timeframes for its application and assert that such application depends on when the eligible personal property is "initially classified" in Arizona. However, confusion can arise because personal property may be acquired, reported, classified, and assessed during different calendar years, and certain circumstances can affect the specific year of initial classification (e.g., personal property acquired out of state and later brought to Arizona, personal property acquired but not immediately placed into service, escaped personal property, etc.). Therefore, care must be taken to ensure the proper and timely application of additional depreciation.

standard depreciation schedules prepared by the Department. A.R.S. [42-13054\(B\)\(3\)\(f\)](#) and [42-13353\(C\)\(6\)](#).

Nominal Value Application: 2022 and Subsequent Years

For all eligible personal property in Classes One, Two, and Six⁵ that was initially classified in Arizona during or after 2022, additional depreciation is not applied incrementally. Instead, a valuation factor of 2.5 percent is immediately and indefinitely applied to such property. A.R.S. [42-13054\(B\)\(4\)](#).

Minimum Value Limitation

Additional depreciation will not reduce the valuation of eligible business personal property below the minimum value prescribed by the Department for property in use. A.R.S. [42-13054\(C\)\(2\)](#) and [42-13353\(D\)](#). See [Minimum Value](#) below.

Valuation Tables Structure

The Department valuation tables contain valuation factors for the calculation of **both** standard and additional depreciation. **Nonshaded rows in the tables contain standard valuation factors** that are used to calculate the full cash value of an asset. **Shaded rows contain additional depreciation factors** that should only be applied to eligible personal property.

Minimum Value

A minimum valuation factor is applied if business personal property is still in use **after** the number of expected life years has passed. In contrast to depreciation under federal taxation, personal property still in use maintains a minimum value, never reaching zero, until it is scrapped or discarded. This is an example of the concept of “value in use.” For qualifying business personal property in property Class One, Subclasses (8), (9), (10), (13), and in property Class Two, Subclass (P), the minimum value of taxable property

⁵ **Note:** Business personal property subject to a statutory valuation methodology is **not** eligible for additional statutory depreciation, e.g., photovoltaic property (A.R.S. [42-13056](#)).

still in use is 2.5 percent. A.R.S. [42-13055 \(A\) and \(B\)](#). See also A.R.S. [42-13054\(C\)\(2\)](#) and [42-13353\(D\)](#).

Business Personal Property Exemption

For 2023, the first \$225,572 of the full cash value of taxable personal property for each taxpayer will be exempt.⁶ A.R.S. [42-11127](#). Business personal property in the following property classes and subclasses is eligible for this exemption.⁷

Property Class One, Subclasses (8), (9), (10), (11), and (13).

Property Class Two, Subclass (P) (a) and (b).

Pursuant to A.R.S. [42-11127\(B\)](#), the Department is required to annually adjust the maximum exemption amount for the following tax year to account for inflation. The inflation adjustment is based on the total biennial change in the U.S. Bureau of Labor Employment Cost Index for the two most recent complete state fiscal years.

Trending and Improvement Depreciation

[Valuation Table 1](#) is trended for price changes in acquisition cost, based upon data from a published comparative cost index.

[Valuation Table 6](#) is designed to mirror depreciation applied to the real property rolls. It provides a way to depreciate what would normally be considered real property improvements on the personal property rolls. Alternatively, the same result can be obtained by determining a value for the improvement in question on the real property roll and then annually listing that amount on the personal property roll.

⁶ With respect to this exemption, “taxpayer” means the owner of the subject property who pays taxes, rather than a property location or assessment account. Thus, a business entity that operates multiple locations is entitled to only one statewide exemption, rather than an exemption for each location. [Circle K Stores, Inc. v. Apache County](#), 199 Ariz. 402, 407-08, 18 P.3d 713, 718-19 (App. 2001).

Note: The Federal Employer Identification Number (FEIN) assigned to each business entity is analogous to the Social Security Number assigned to individuals, and carries similar privacy considerations.

⁷ **Note:** Residential rental property is not eligible for this exemption. A.R.S. [42-12004](#) and [42-11127](#).

2023 Valuation Table 14

Valuation Table 14 is to be used for 2023 business personal property and 2024 affixed manufactured housing valuations.

This Table contains valuation factors (percent good) for manufactured homes and mobile homes, travel trailers, mobile offices, and park models.

Definitions for the Codes used in Valuation Table 14:

Code 72	Manufactured Homes and Mobile Homes
Code 721	Travel Trailers — 8' wide, 32' long or less
Code 722	Mobile Offices — 8' wide or less, 40' long or less
Code 723	Mobile Offices — greater than 8' wide, greater than 40' long
Code 724	Park Models (not self-contained) — 8' wide, 33'–40' long
Code 725	Park Models (not self-contained) — greater than 8' wide, 33'–40' long

NOTES:

- If a Code 72, 721, 724, or 725 property is identified as being used for a commercial purpose, A.R.S. [42-13054](#) and [42-13353](#) should be consulted to determine whether additional depreciation should be applied.
- You **MUST** refer to [Additional Statutory Depreciation](#) above to determine which property classes and subclasses of manufactured homes, mobile homes, mobile offices, and park models receive additional depreciation. **Only the shaded rows** in the following table reflect composite valuation factors that incorporate additional depreciation.

2023 Valuation Table 15

The square foot valuation method is based on published building cost indexes. Key features of the square foot method include:

- Replacement cost new less depreciation is derived, rather than historic cost less depreciation.
- Quality indicator / grade is based on the original quality of the manufactured housing.⁸
- Separate depreciation schedules are used for single- and multi-section manufactured housing.
- Depreciation tables are created using manufactured housing sales.
- Additional adjustments may be necessary for mobile offices, park models, or travel trailers.

The replacement cost new of a manufactured housing unit is calculated based on size, number of sections, and construction quality. The replacement cost new will be adjusted annually to reflect changes in the manufacturing costs of new manufactured housing units. With respect to size, only livable square footage should be included. Because the dimensions listed on a title may include structures like the towing tongue and/or porch of a manufactured housing unit, a field check is necessary to obtain accurate measurements for calculating the livable square footage.

The appropriate valuation factor is applied to the replacement cost new to derive the replacement cost new less depreciation for each manufactured housing unit. Valuation Table 15 contains valuation factors to be used with the square foot method.

⁸ The quality indicator / grade benchmarks developed by the Department are based upon statewide data and should be used only as a starting point. Assessors should conduct a field check in order to make a final determination of the quality indicator / grade of individual manufactured housing units.
