- New users registered in AZTaxes.gov: 122,696
- Number of logins to AZTaxes.gov: 4,256,367
- Unclaimed property dollars returned to customers: $48.4 million
I am pleased to provide the fiscal year 2020 update to the Arizona Department of Revenue 2018-2022 Strategic Plan.

As the cover for this fiscal year’s update showcases, the Department of Revenue’s focus is to fund the many programs and services that Arizonans enjoy and rely on every day.

Based on the agency’s mission of Serving Taxpayers!, the department’s approach to this fiscal year continues to be guided by the five-year blueprint’s four priorities of optimizing taxpayer services, accelerating processing, maximizing taxpayer education and compliance, and supporting and championing the agency’s mission.

For fiscal year 2020, the agency is implementing remote seller legislation, which requires out-of-state sellers and marketplace facilitators to begin filing and paying TPT in Arizona as of October 1, 2019.

The updated plan has corporate taxpayers filing their income tax electronically in 2020, an important advancement in this department’s commitment to e-filing and supports another objective to continue to increase electronic filing and paying.

This fiscal year’s update also includes conforming to the Internal Revenue Code, which encompasses key modifications to state tax forms and systems, as well as reducing the number of tax brackets from five to four for individual income taxes.

Additionally, the Strategic Plan Update for fiscal year 2020 has the department enhancing our agency’s administration and execution of the transaction privilege tax system, which is part of ADOR’s ongoing collaboration with municipalities and counties. And the plan outlines a commitment to further developing taxpayer communication plan that will result in compiling and evaluating all existing communications to taxpayers to determine what is needed to further develop all information that is shared with our customers.

This update maintains ADOR’s steadfast commitment to results-driven management through the Arizona Management System to deliver better, faster and more cost-effective service for Arizonans. It also maintains a focus on customer service that was built into our five-year strategic plan.

Carlton Woodruff
Interim Director
Our strategy begins with a comprehensive look at ADOR’s ecosystem as an organization — an ecosystem that includes a variety of perspectives and demands that influence our vital mission. We then make an honest assessment of our recent past and current reality, including a brutally honest evaluation of our performance. We refer to this as the “current state”. The Governor’s vision for the state and the agency’s vision together define our desired “future state”. It is by analyzing the gap between our current state and future state that we develop our plan. ADOR has adopted strategic goals to close the gap between the reality of our current challenges and future state vision.

In addition to the goals, ADOR has identified strategic initiatives to help overcome challenges that could keep us from closing the gap. The strategies are to be developed as specific projects to resolve the challenges. The outcomes associated with our goals, as supported by our strategies, and as executed through our projects, will be measured rigorously by our performance measures.

The performance measures ADOR has adopted track success through two primary lenses: the return on investment that taxpayers demand as an outcome of fulfilling our mission — i.e., delivering the revenue that finances Arizona’s future, and customer value in the form of quality service.
## STRATEGIC PLAN - FY 2019

**Vision:** Funding Arizona’s future through excellence in innovation, customer service and continuous improvement.

Arizona Management System...I don’t think there is an agency in the state that has embraced that and brought it to life with more success than the Department of Revenue.

— Governor Doug Ducey
